Classroom Toolkit — Start here

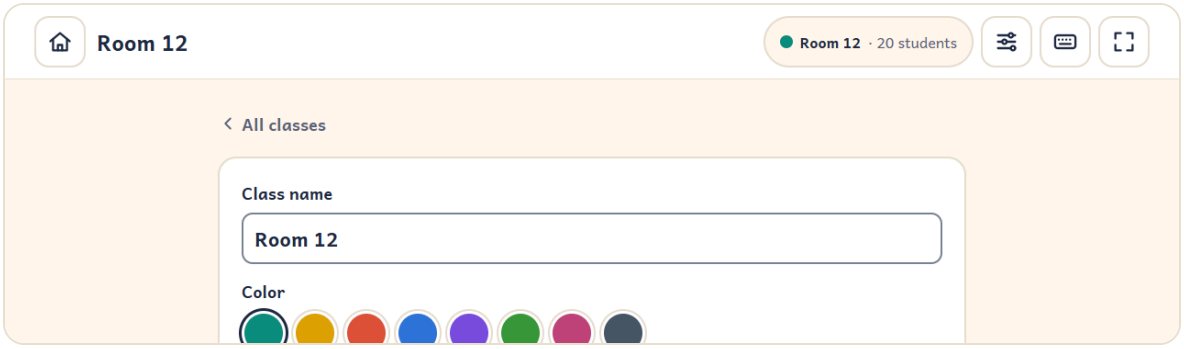

The free version: Name Picker, a timer, dice and a class goal. No ads, no logins, no internet needed.

1 Save the file

- Unzip the download. Keep the file **classroom-toolkit-free.html** somewhere easy, like your Documents or Desktop.
- **Double-click it.** It opens in your web browser (Chrome, Edge, Safari or Firefox) and works without the internet.
- Always open the **same file** on the **same computer**: that's where your classes are saved.

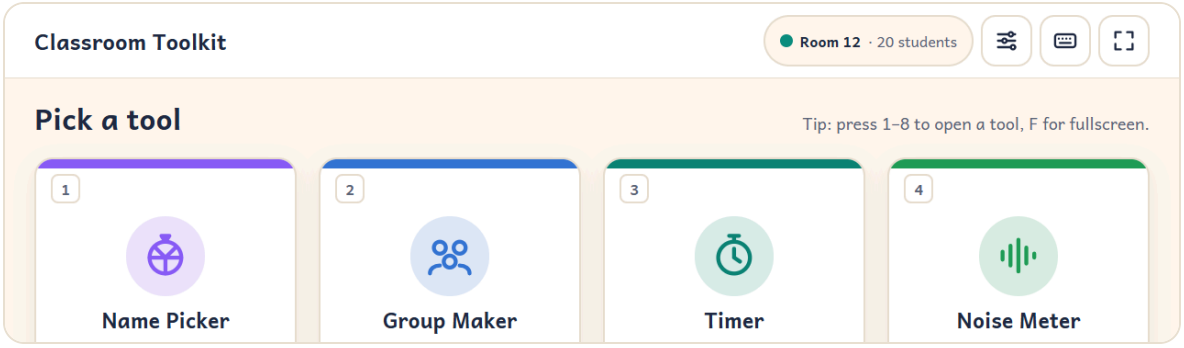

2 Add your class

Press **My Classes**, then **New class**. Paste your students' first names (one per line, or separated by commas) and press **Add students**. Tap **Here** to mark someone absent today.

3 Open a tool and go fullscreen

Choose a tool on the Home screen (or press its number key, 1–8). Press **F** for fullscreen on your board. Press **?** to see all keyboard shortcuts.

What's inside

Name Picker
Spinning wheel or cards. Everyone gets a turn before repeats.

Timer & Stopwatch (lite in the free version)
Digital, pie, bar or sand timer; warnings at 1 minute and 10 seconds.

Class Points (lite in the free version)
A shared class goal (marble jar) and team points with confetti.

Work Mode — full version
Voice levels 0–4, work mode cards and a Now / Next / Later board.

Group Maker — full version
Random groups in one click, with keep-apart and keep-together rules. Print or save.

Noise Meter — full version
Shows how loud the room is. Nothing is ever recorded.

Center Rotations — full version
Which group goes where, with a timer that moves everyone on.

Dice & Random (lite in the free version)
Dice, coin flip, random numbers and letters.

Tips

On a smartboard

Press F for fullscreen; the buttons fade until you move the mouse. In Settings, turn on **Teacher lock** so students can't leave a tool, and try **Projector mode** if colors look pale.

Keep the screen on

The app asks the computer not to sleep while a timer or rotation runs. For long timers, also turn off screen sleep in your computer's settings.

Use your classes on another computer

In My Classes press **Export all**, copy the file to the other computer (USB stick, email or cloud drive), open the app there and press **Import** (Import is in the full version).

Private by design

No ads, no accounts and nothing sent over the internet. Student names are saved only in your browser on your computer. Tip: use first names or nicknames.

Something not working?

- **Classes disappeared?** Are you using the same browser and the same file? Private or "incognito" windows don't save.
- **No sound?** Check the Sound button on the tool, the computer's volume, and Settings → Sound.
- **Still stuck?** Ask in the Q&A on the Teachers Pay Teachers product page. I'm happy to help.
